Print this page. Circle the words in the paragraph and unscramble them in the blanks.

Calvin Coolidge was born in Vermont. He learned the value of hard work when he was a child. After he finished college he studied law and became a lawyer. During his lifetime he held many public offices. He was a representative, a senator, lieutenant governor, and also governor of the state of Massachusetts. He was vice-president to Warren G. Harding and became President of the United States when Harding died. Coolidge, a Republican, was in favor of a small federal government. He believed the cities and states should take care of their own needs. He was a reserved man and many of his time viewed him as dull, but they also knew him as a man of integrity. He accomplished a lot during his administration.
