

Hippocrates

<http://gardenofpraise.com/ibdhipp.htm>

Hippocrates lived	400 years before the birth of Christ.
He is known as the	matched four elements; earth, air, fire, and water.
Many of the things he discovered	included rules for the conduct of doctors.
In the time of Hippocrates, people	were very superstitious.
People believed four fluids in the body	was called Aesculapius.
Their god of medicine	exercise moderation in all things.
Hippocrates taught that	are still practiced today.
He told his students to carefully observe	diseases came from natural causes.
Hippocrates thought the human body	men of honor according to Hippocrates.
He urged his patients to	could heal itself and return to health.
Physicians should be	their patients to learn about their illnesses.
The Hippocratic Oath	father of medicine.
