

Donald O'Neal

<http://gardenofpraise.com/ibdoneal.htm>

Guatemala is	used in Guatemala for generations.
Three-stone stoves have been	the cutting of wood for cooking and heating.
One reason for deforestation is	helps when the stove is assembled in the home.
Many people have been injured when	was working with a medical missions team.
Don O'Neal was by profession	readily accepted the new stove.
He observed the problem in Guatemala when he	they fell into open fires in the houses.
The ONIL stove is safer because	by Prince Charles.
Smoke from the open fires causes	a country in Central America.
The women in the villages	damage to the eyes and lungs.
A member of the household	less wood than an open fire.
The ONIL stove uses 70%	the fire is enclosed and raised about the floor.
Don O'Neal was presented an award	a mechanical engineer.
