

Walter Reed

<http://gardenofpraise.com/ibdreed.htm>

Walter Reed received his medical degree

that mosquitos carried yellow fever.

Reed and his wife had two children

served as the lone doctor in an outpost.

Reed joined the army because

and adopted an Indian girl.

For sixteen years he

died of yellow fever.

At one time he was looking after

made possible the building of the Panama Canal.

When he studied at Johns Hopkins Hospital

died of typhoid fever.

In the outpost many soldiers

by the time he was 18 years old.

Many people became sick because they

spraying the water with chemicals.

90,000 people in the United States

they allowed him to study for seven months.

After his experiments he concluded

did not observe sanitary conditions.

They got rid of mosquitos by

several hundred Indians.

His work in stopping the spread of yellow fever

he thought he could advance further.
